### Corrigendum

## Corrigendum to A methodology for wavelength dispersive electron probe microanalysis of unpolished silicate minerals [J. Geochem. Explor. 159 (2015) 243–251]

S. Timmerman<sup>a,\*</sup>, S. Matveev<sup>a,b</sup>, M.U. Gress<sup>a</sup>, G.R. Davies<sup>a</sup>

The average major element data of Venetia xenolith samples AT1324 and 1361 were initially determined on polished thin sections and mineral mounts and reported in van der Meer et al (2013). We would like to thank the authors for providing us with the raw major element data and mineral separates.

van der Meer, Q. H. A., Klaver, M., Waight, T. E., Davies, G. R., 2013. The provenance of sub-cratonic mantle beneath the Limpopo Mobile Belt (South Africa). *Lithos* 170, 90-104.

The authors would like to apologise for any inconvenience caused.
